

Keeping your home comfortable all year is simple with the dual-purpose technology of a cold-climate heat pump. Install one today and take advantage of our rebates. Call 800-493-3299 or visit otpc.com/CCHP to learn more.

Heat and cool with a cold-climate heat pump

It's a dual-purpose solution for comfort!

Federal tax credits and our rebates

In addition to our rebates, federal tax credits are available to residential customers on qualified installations for 30 percent of the cost up to \$2,000!

To qualify heat pumps must be rated with an HSPF2* of 8.1+ and a SEER2* of 15.2+, or an EER2* of 10.0+.

Federal rating requirements are higher than requirements for our rebates, so you may qualify for both when federal HSPF2 and SEER2 ratings are met.

Save energy in any extreme

Our weather goes to extremes. But hot or cold, a cold-climate heat pump (CCHP) offers high efficiency. CCHPs operate with **200 percent efficiency** at 0°F and up to **400 percent efficiency** in warmer temps.

Rebates and requirements

Ductless CCHP: Get \$500 per ton when rated with a 10+ HSPF/9.5+ HSPF2 and labeled ENERGY STAR® or rated 15+ SEER/SEER2.

Ducted CCHP: Get \$700 per ton when rated with a 9+ HSPF or 7.6+ HSPF2 and labeled ENERGY STAR® or rated 15+ SEER or 14.3+ SEER2.

Other rebate options are available for installations on our discounted off-peak rates.

**Terms: HSPF/HSPF2: Heating Season Performance Factor; SEER/SEER2: Seasonal Energy Efficiency Rating. EER2: Energy Efficiency Rating.*

Special rules apply for Minnesota homes heated with natural gas.
